| <b>Instructor:</b>      | Prof. Ossie Rashel  |
| <b>Office Location:</b> | Eng 245   |
| <b>Telephone:</b>       | (408) 924-4124  |
| <b>Email:</b>           | ossie.rashel@sjsu.edu   |
| <b>Office Hours:</b>    | T 11:00am – 12:00pm<br>R 12:30pm – 2:00pm                             |
| <b>Class Days/Time:</b> | T 9:00am – 10:45am Lecture Sec 02<br>R 9:00am – 12:15, Lab Section 12 |
| <b>Classroom:</b>       | Eng 103 Lecture & Lab   |
| <b>Prerequisites:</b>   | Tech 60 or equivalent   |

**Course Format**

**Faculty Web Page and MYSJSU Messaging**

Course materials such as syllabus, handouts, notes, assignment instructions, etc. can be found on [Canvas Learning Management System course login website](http://sjsu.instructure.com) at <http://sjsu.instructure.com>.

**Course Description**

Introduction to networks and networking concepts. Network architectures. Network media. Configuring network operating systems. Making networks work. Network topology, standards, and protocols. Basic network design.

**Course Learning Outcomes (CLO)**

Upon successful completion of this course, students will be able to:

1. Describe the limitations, advantages, and disadvantages of each major network architecture, including Ethernet, token ring, AppleTalk, ARCnet, FDDI, and ATM.
2. Identify LANs and select appropriate hardware and software for specific networking needs.
3. Manage a computer network.

4. Design and setup a small network.

## Required Texts/Readings

### Textbook

Tomsho, G. (2016). Guide to Networking Essentials, (7<sup>th</sup> Ed). Cambridge, MA: Course Technology. ISBN-13: 9781305105430. Available at Spartan Bookstore/

### Other technology requirements / equipment / material

TestOut Network Pro is the required software portal for the lab assignments as well as to reinforce the lecture material can be purchased online. This software also has videos covering most of the Tech 65 networking material. The instructions are in the "[TestOut Network Pro Student Worksheet](#)" document on [Canvas](#) (<https://sjsu.instructure.com>) under the "Modules" tab. The link to the [student purchasing guide](#) is <http://www.testout.com/home/student-resources/student-purchasing>. **The promo code is 14-380ta** and the course is **Tech 65 S-2017**

## Course Requirements and Assignments

### Class Participation

You will answer selected questions for each chapter of the textbook. These questions are posted on Canvas. Click on the **Modules** tab. You can work in groups but *each student* must submit his/her own answers via Canvas by the due date. Class Participation contributes to CLO 1, learning the fundamental concepts and network terminology, developing teamwork skills and discussing the course material. You will submit it via Canvas by the due date. Class Participation is submitted weekly and has a weight of 10% of the final grade.

### Case Projects

You will work in groups of 2-3 students to answer and submit the Case Projects reports (located in the textbook) on or before the due date. *Only one report per group*. Only the indicated students will get the credit. Case Projects contribute to CLO 2, applying the course material in solving proposed scenarios related to computer networks and developing teamwork skills. Case Projects are submitted weekly and have a weight of .10% of the final grade.

### Lab Assignments.

You are expected to complete the lab experiments in the TestOut Network Pro software. It is to your advantage and professional development to complete each lab assignment, do a conscious work and do not procrastinate. It is strongly recommended that you complete these laboratory assignments on a continuous basis rather than all of them at once. All the scores you obtained will be kept by the program but only the highest score will be considered. Lab assignments contribute to CLOs 3 and 4, reinforcing the course material and developing teamwork skills. All the lab assignments must be completed on or before the last day of instruction on **May 16, 2017**. Lab Assignments have a weight of .10% of the final grade.

## Research Paper

Each student will write a research paper. Even though two students can select the same topic and make a PowerPoint presentation to the class together each student must submit his/her own research paper. A sample list of topics is indicated on the last page; however, if you would like to explore a topic of great interest to you then you should obtain the instructor's approval.

The research paper must include a title page, index, introduction, main body, conclusions, and references. The main body should have between 10 to 15 pages, double-spaced. Submit your research paper as an attachment in PDF format (preferable) or in WORD and as a single electronic file via [Canvas](https://sjsu.instructure.com) (<https://sjsu.instructure.com>). This means that the title page, main body, circuit, references and any appendices must be incorporated in a single document. You **do not** need to submit a hard copy.

You will select your topic of interest via Canvas by clicking on the **Collaborations** tab. You must select your topic by **February 14, 2017**.

Research Paper contributes to developing research and writing communication skills. Research Paper is due on **May 9, 2017** and has a weight of 5% of the final grade.

**Note:** Before submitting the research paper check that it complies with the Research Paper guidelines posted on Canvas.

## Oral Presentation

Students, working in groups of two, will explain their findings of the research paper to the class. Each group has a 5-7 minute time frame to get their points across. It is strongly recommended that you rehearse your presentation and use a professional presentation software package such as PowerPoint.

You **do not** need to submit a copy of your PowerPoint presentation.

**Review** the Oral Presentation Rubric posted on Canvas so you can do an exceptional and impressive presentation.

Oral Presentations contribute to developing oral communication skills. **Oral Presentations will start on 2/21/2017** and have a weight of .5% of the final grade.

## Design and Setup of a Small Network

Students working in groups of 2 - 4 will design and setup a small wired network with 3 or 4 workstations. Each group will provide its own hardware and software and will decide on the best NOS and the appropriate setup. This small wired network should be able to access files among all workstations, access to a printer and/or access to a scanner. Each student must show his/her mastery of these skills by videotaping all the process including but not limited to parts identification, hardware/software installation, peripherals configuration and configuration setup. This means that while one of the members performs the process, another member videotapes him/her; then take turns.

Upload the video to YouTube or to any Cloud computing service and email the link with the names of all group members to the instructor.

The small network design contributes to CLO 4, developing teamwork skills and discussing the course material. The due date is **May 11, 2017** and has a weight of .10% of the final grade.

### **Tests**

You will take four quizzes, two midterms and the final exam. Tests will start and end at the indicated times on the green-sheet. These tests contribute to CLO 1 and reinforcing the learning of the fundamental concepts and network terminology.

### **Final Examination**

Final Exam will be taken Thursday, May 23 from 7:15am to 9:30am. The time frame is 100 minutes. You can take the Final Exam up to two (2) times. *In this case the higher score will be considered.*

### **Grading Information**

Quizzes, midterms and final exam will be administered via Canvas. You will have the opportunity of practicing them so while you have more opportunities to learn the course material you will have a better chance of earning high grades. Class Participation and Case Projects will be evaluated based on the percent of accurate responses provided. Lab Assignments grade will be determined on the percent of lab assignments completed until the last day of classes.

Research Paper must follow the APA guidelines and must include the title page, index, introduction, main body, conclusions, and references. Oral Presentation grade will consider the mastery of the topic, quality of the slides, looking at the audience, no misspellings and the 15 minute time frame to explain the main points. The design and setup of a small network grade will be based on showing a functional wired network and answering questions related to this design.

### **Determination of Grades**

Grades will be determined based on your performance in Lab Assignments, Class Participation, Case Projects, Small Network Design and Setup, Research Paper, Oral Presentation, Quizzes, Midterms and Final Exam. The final grade for the course will be based on the following items and weights:

|                                  |     |
|----------------------------------|-----|
| Lab Assignments                  | 20% |
| Class Participation              | 10% |
| Case Projects                    | 10% |
| Small Network Design and Setup   | 10% |
| Quizzes (4)                      | 10% |
| Midterms (2)                     | 15% |
| Research Paper/Oral Presentation | 10% |
| Final Exam                       | 15% |

The final grade will be determined according to the following scale:

|                 |                 |                 |                 |
|-----------------|-----------------|-----------------|-----------------|
| A+ = 96 - 100%  | A = 93 - 95.9%  | A- = 90 - 92.9% | B+ = 87 - 89.9% |
| B = 83 - 86.9%  | B- = 80 - 82.9% | C+ = 77 - 79.9% | C = 73 - 76.9%  |
| C- = 70 - 72.9% | D+ = 66 - 69.9% | D = 60 - 65.9%  | F = 0 - 59.9%   |

1. Check continuously your standing in the class on [Canvas](https://sjsu.instructure.com) (https://sjsu.instructure.com). Notify the instructor immediately if there is an error in any of your grades. **You have up to 7 calendar days** to notify the instructor if your grade is missing or has been recorded incorrectly. ***The last day to correct any discrepancy is the last day of instruction (May 16, 2017).*** There will be no change in your grade after the final grade has been submitted to the university.
2. All late assignments submitted up to 7 calendar days after the due date and time will have a penalty of 50%.
3. **Assignments submitted after 7 calendar days of the due date will not be accepted and they will be recorded as 00.**
4. The last day to submit assignments is **May 16, 2017**.
5. If you miss a quiz and/or a Midterm you have up to 72 hours to take it with a 30% penalty.
6. If you miss the Final Exam you have up to 24 hours to take it with a 30% penalty.
7. In all **Group Assignments** only **one report** needs to be submitted by a designated member of the group. Make sure that all members of the group are mentioned in the report. **Only the students whose names are indicated on the group report will get the credit.**
8. Any email sent to the instructor requesting him to violate any of these ground rules or to improve your final grade because you need 0.1 point to improve from C+ to B-, do not want to repeat the class or are at risk of being disqualified from the university, etc. **will not be considered.**

### **Classroom Protocol**

1. You are expected to attend all meetings for the course as you are responsible for material discussed therein, and active participation is frequently essential to ensure maximum benefit to all class members. Attendance is fundamental to course objectives; for example, you may be required to interact with others in the class.
2. You will study the assigned textbook chapter/material before coming to lecture and reviewing the PowerPoint presentation posted on [Canvas](https://sjsu.instructure.com) (https://sjsu.instructure.com). Click on the **Modules** tab.
3. You will answer selected questions for each chapter. The questions for each chapter are posted on Canvas under **Class Participation** on the **Modules** tab. You can work in groups but **each student** must submit his/her own answers via [Canvas](https://sjsu.instructure.com)

(<https://sjsu.instructure.com>). Click on the **Assignments** tab. This will constitute your *class participation* grade.

4. After reviewing the chapter materials you will answer the Case Projects located at the end of each chapter of the textbook. You will work in groups of 2-3 students to answer and submit the Case Projects reports on or before the due date. ***Only one report per group. Only the indicated students will get the credit.***
5. Be prepared to check your answers of the Case Projects and participate in Group Discussion. This group discussion will reinforce and/or enhance your networking knowledge with current and relevant information.
6. Instructor will explain key points, answer questions from students and may add related material to enrich the course content. Instructor will become more as a facilitator of learning. This means that the instructor will provide as much individual or group assistance as needed.
7. You should work and learn in teams. This is very important to be successful in the real world.

### **University Policies**

Per University Policy S16-9, university-wide policy information relevant to all courses, such as academic integrity, accommodations, etc. will be available on Office of Graduate and Undergraduate Programs' [Syllabus Information web page](http://www.sjsu.edu/gup/syllabusinfo/) at <http://www.sjsu.edu/gup/syllabusinfo/>

# Tech 65 Networking Theory and Applications, Spring 2017 Course Schedule

*List the agenda for the semester including when and where the final exam will be held. Indicate the schedule is subject to change with fair notice and how the notice will be made available.*

## Course Schedule\*\*

| Week | Date   | Topics, Readings, Assignments, Deadlines  |
|------|--------|---|
| 1    | Jan 24 | <ul style="list-style-type: none"> <li>• Introduction/Orientation/Greensheet</li> <li>• <b>Email</b> Proof of completion of course prereq (Tech 60 or equivalent and MATH 008 or Equivalent)</li> </ul> <p><i>Prepare for next session:</i></p> <ul style="list-style-type: none"> <li>• <b>Read</b> Textbook, Chapter 1: Introduction to Computer Networks</li> <li>• Review PPT, Chapter 1</li> <li>• Answer Case Projects, Chapter 1 (located in the textbook)</li> </ul> <p>Answer Class Participation, Chapter 1 (located on Canvas --&gt; Modules tab)</p>  |
| 2    | Jan 31 | <ul style="list-style-type: none"> <li>• Discuss Chapter 1</li> <li>• Check/discuss answers Case Projects, Chapter 1</li> <li>• <b>Email</b> Proof of completion of course prereq (Tech 60 or equivalent and MATH 008 or Equivalent)</li> <li>• <b>Submit</b> Case Projects, Chapter 1. <i>Due by 11:00 pm on 2/2 Only 1 report /Group. Only the indicated students will get the credit.</i></li> <li>• <b>Submit</b> Class Participation, Chapter 1. <i>Due by 11:00 pm on 2/2 Individual submission.</i></li> <li>• You will select your topic of interest via Canvas by clicking on the <b>Collaborations</b> tab. You must select your topic by <b>February 14, 2017</b></li> </ul> <p><b>Note:</b> Even though the due time in Canvas is 11:55pm the actual due time is <b>11:00pm</b> so you have some extra minutes for your submission. This is for all submissions.</p> <p><i>Prepare for next session:</i></p> <ul style="list-style-type: none"> <li>• <b>Read</b> Textbook, Chapter 2: Network Hardware Essentials</li> <li>• Review PPT, Chapter 2</li> <li>• Answer Case Projects, Chapter 2 (located in the textbook)</li> <li>• Answer Class Participation, Chapter 2 (located on Canvas --&gt; Modules tab)</li> </ul> |

## **Suggested Topics for the Research Paper/PowerPoint Presentation**

1. Optical Networking
2. Network Hardware
3. Network Topologies
4. Network Technologies
5. Network Media
6. Network Protocols
7. IP Addressing
8. Network Reference Models and Standards
9. Network Hardware in Depth
10. Wide Area Networking
11. Cloud Computing
12. Network Management and Administration
13. The role of networking in Manufacturing
14. Network Troubleshooting and Support
15. Smarter Manufacturing
16. Serial communications in Integrated Manufacturing
17. Manufacturing Business Technology
18. Why are networks important in Manufacturing
19. Safety networks in auto manufacturing
20. The role of parallel communications in Manufacturing
21. Neural networks for manufacturing process control systems
22. Networking for Manufacturing Industries
23. Information Systems in Manufacturing Networks
24. Wireless device networking in process industry
25. Asynchronous Transfer Mode (ATM)
26. Fiber Distributed Data Interface (FDDI)
27. Network Architectures
28. Synchronous Optical Networking (SONET)
29. Switched Multimegabit Data Service (SMDS)
30. Virtual Private Networks
31. Microwave networking technologies
32. Devices and technologies for securing wired networks
33. Active Directory
34. Domain Name System (DNS)
35. Remote Access Service (RAS)
36. Smartphone technology
37. Other. (Request the instructor's approval first)
