

PRESENTS: GREAT BRITAIN

The College of Health and Human Sciences (CHHS) has initiated a requirement for students to participate in an international experience prior to graduation. The goal of CHHS's international experience requirement is to introduce students to international and intercultural perspectives in order to prepare them to live and work in an increasingly globalized world.

Studying abroad is a high-impact educational practice that has been shown to increase student success and employability after graduation. The CHHS International Experience is designed to provide high-quality global learning experiences that are flexible, affordable, and relevant to students' degree programs and professional goals.
